

Product Requirements Document (PRD) - Infonote

1. Product Overview

Infonote is an infinite-canvas, spatial note-taking application designed to revolutionize how individuals and teams organize information. Built with React, TypeScript, and Vite, it offers a visually rich, 2D plane where users can create, connect, and manage "note cards" seamlessly.

Unlike traditional linear note-taking apps or hierarchical folder systems, Infonote leverages spatial organization, allowing users to map out their thoughts, projects, and tasks exactly as they connect in their minds.

2. Product Purpose and Vision

The core purpose of Infonote is to bridge the gap between unstructured brainstorming and structured project management.

3. Target Audience

- Knowledge Workers
- Project Managers & Teams
- Creatives & Designers

4. Core Features

- Infinite Canvas
- Dynamic Note Cards
- Rich Block-Based Editor
- Visual Project Management (Kanban)
- Advanced Search
- Local Storage & Backups

5. Technical Stack

React 19, TypeScript, Vite, Zustand, React Flow

6. Future Roadmap

- Real-time collaboration
- AI integration
- Mobile support
- Export capabilities
